

TCO LOAN 11 POSSIBLE PVT LTD

System Architecture

Used Car Loan Operations · End-to-End Workflow

3 Core Sheets

4 Master Sheets

Auto-Linked

Account Team · RTO Team · Management

Complete System Flow

How data moves from Case Entry → Payment → RTO Transfer

Link Key = VEHICLE NO.

Trigger = PAID status in Account Sheet

Master Sheets = Dropdown source

Sheet 1 — DM Entry Sheet

Branch-wise Case Logging

Each branch executive logs a new case here. All data then flows automatically to the Account Sheet.

⚡ AUTO FIELDS

S. No.	Auto Serial
DM No.	Auto Generate
Month	From Date
Status	LOGGED (Default)
Entry Date	Today's Date

✎ MANUAL ENTRY FIELDS

Customer Name / Mobile / Email
Vehicle No. (REG NO) 🔑 Primary Key
Model Bank Product Type
Loan Amount Insurance Suraksha
ROI EMI Tenure Disbursed Amount
File Charge RTO Amount PTD
Executive Name ← Dropdown from Employee Sheet
Branch ← Dropdown from Branch Sheet
Dealer Name ← Dropdown from Dealer Sheet

Sheet 2 — Account Sheet

Payment & Payout Entry

When a DM is logged, Account team pulls the case by Vehicle No., enters payment details, and marks PAID. This triggers RTO.

AUTO-PULL FROM DM

Customer Name

Vehicle No.

Agent Name

PAID  ← RTO TRIGGER

RC Transfer Date

When PAID = 'PAID' → Sheet 3 RTO Tracker gets a new entry automatically (matched by Vehicle No.)

Sheet 3 — RTO Tracker

Transfer & RC Status

After Account marks PAID — RTO team picks up the case, assigns a vendor, processes transfer, and tracks RC until delivery.

AUTO-PULL (from Account)	RTO MANUAL ENTRY	STATUS & HANDOVER
Date	Vendor Name (Dropdown)	Status (Dropdown)
Vehicle No.	RTO Receipt No.	Pending Days (AUTO ⚡)
Customer Name	Transfer Date	Pending Bucket (AUTO ⚡)
Executive	RTO Scan File Link	RC Received ☒ / ☒
Branch	System Remarks	RC Handover To
Bank (HPA)	Remarks / Issue	Handover Date
Dealer	HP Add ON (Bank)	RC Handover Proof
DM No.	HPA Accounts	Final Remarks

☒ Pending Days = Today – Payment Date (Auto) | Buckets: 0-15 / 16-30 / 31-45 / 45+ (Auto) | Status Dropdown: In Process → Transferred → RC Received

Remarks

All 4 Master Sheets provide Dropdowns in DM Entry Sheet — Standardized data, zero manual spelling errors

Data Flow — Step by Step

1

Branch Executive: Opens DM Entry Sheet and logs a new case

Fills: Customer Name, Vehicle No., Bank, Loan details, Dealer (Dropdown)

2

System (Auto): DM No., Month and Status auto-generate

Vehicle No. becomes the Primary Key for the entire system

3

Account Team: Opens Account Sheet — customer details auto-pull by Vehicle No.

Manually enters: UTR, Payment date, Payout to Dealer, RTO Pay amount

4

Account Team: Marks PAID = 'PAID' → RTO Tracker auto-triggered

New row appears in Sheet 3 automatically — no manual copy-paste

5

RTO Team: Sees new case in RTO Tracker — assigns Vendor and starts transfer

Pending Days count auto-starts from Payment Date

6

RTO Team: RC Received → RC Handed Over → Case Closed 

Final status updated. Management sees live KPI summary.

Reports & KPIs

What this system enables for Management

Branch Report

- ▶ Total Cases per Branch
- ▶ PAID vs Pending
- ▶ RTO Complete %
- ▶ Month-wise Trend

Executive Report

- ▶ Cases per Executive
- ▶ Net Score Total
- ▶ Incentive Earned
- ▶ Pending Cases

Dealer Analysis

- ▶ Cases per Dealer
- ▶ Payout Total
- ▶ Bank-wise Split
- ▶ Monthly Volume

RTO Aging Report

- ▶ 0-15 Days Bucket
- ▶ 16-30 Days Bucket
- ▶ 31-45 Days Bucket
- ▶ 45+ Critical

Payment Summary

- ▶ Total Disbursement
- ▶ Total RTO Pay
- ▶ Net Score
- ▶ Hold Amounts

RC Status Board

- ▶ In Process Count
- ▶ Transferred Count
- ▶ RC Received
- ▶ Pending Handover

What We Are Building

1

3 Core Sheets

DM Entry → Account → RTO Tracker

Vehicle No. links all sheets

PAID status triggers RTO

2

4 Master Sheets

Employee / Branch / Dealer / Bank

Dropdown source for all entries

Standardized — no spelling errors

3

Auto Reports

Branch / Executive / Dealer / RTO Aging

KPI Dashboard ready

Live Management Summary

Next Step: Confirm Platform (Excel / Google Sheets) → Build Master Sheets → DM Entry → Account → RTO Tracker
